

Garment Creator

Adobe Plugins

When using Garment Creator, the standard method of printing a file is to import a saved file in various formats. If you use Adobe Photoshop or Adobe Illustrator, there are scripts available that allows you to send your job directly to Garment Creator without having to save your file and then import. This is fully automated.

****NOTE:** It will overwrite any jobs that are sitting in Garment Creator.

To install: Download both scripts from Epson site.;
<http://tech.epson.com.au/downloads/product.asp>

On a Windows Computer using Illustrator (English Version), copy the Illustrator script into the following folder:

C > Program Files (or Program Files (x86)) > Adobe > Adobe Illustrator (Version) > Presets > en_US > Scripts

On a Windows Computer using Photoshop (English Version), copy the Photoshop script into the following folder:

C > Program Files (or Program Files (x86)) > Adobe > Adobe Photoshop (Version) > Presets > Scripts

On a Mac Computer using Illustrator (English Version), copy the Illustrator script into the following folder:

Applications Folder > Adobe Illustrator (Version) > Presets > en_US > Scripts

On a Mac Computer using Photoshop (English Version), copy the Photoshop script into the following folder:

Applications Folder > Adobe Photoshop (Version) > Presets > Scripts

Once installed, open Illustrator or Photoshop. When your file is ready for print, go to File > Scripts > Garment Creator for Photoshop OR Garment Creator for Illustrator

Garment Creator will open with the image you created with no need to export the file.
